

Syntax

Introducing Linguistics

This outstanding series is an indispensable resource for students and teachers – a concise and engaging introduction to the central subjects of contemporary linguistics. Presupposing no prior knowledge on the part of the reader, each volume sets out the fundamental skills and knowledge of the field, and so provides the ideal educational platform for further study in linguistics.

Part 2	The Base	149
6	X-bar Theory	151
0.	Introduction	151
1.	Bar-level Projections	153
1.1	<i>V-bar</i>	154
1.2	<i>Adj-bar and Adv-bar</i>	156
1.3	<i>P-bar</i>	158
2.	Generalizing the Rules: The X-bar Schema	158
3.	Complements, Adjuncts, and Specifiers	161
3.1	<i>Complements and Adjuncts in NPs</i>	163
3.2	<i>Complements and Adjuncts in VPs, AdjPs, AdvPs, and PPs</i>	168
3.3	<i>The Notion Specifier</i>	170
4.	Some Definitional Housekeeping	171
5.	Parameters of Word Order	172
6.	Drawing Trees in X-bar Notation	175
6.1	<i>Important Considerations in Tree Drawing</i>	175
6.2	<i>A Sample Tree</i>	178
7.	X-bar Theory: A Summary	185
	Ideas Introduced in this Chapter	186
	Further Reading	187
	General Problem Sets	188
	Challenge Problem Sets	192
7	Extending X-bar Theory to Functional Categories	195
0.	Introduction	195
1.	Determiner Phrases (DPs)	196
2.	A Descriptive Tangent into Clause Types	199
3.	Complementizer Phrases (CPs)	204
4.	Tense Phrases (TPs)	208
5.	CP, TP, DP tree	210
	Ideas Introduced in this Chapter	211
	Further Reading	212
	General Problem Sets	212
	Challenge Problem Sets	214
8	Constraining X-bar Theory: The Lexicon	217
0.	Introduction	217
1.	Some Basic Terminology	218
2.	Thematic Relations and Theta Roles	219

Preface and Acknowledgements	xi
3. The Lexicon	224
4. Expletives and the Extended Projection Principle	226
5. Summary	228
Ideas Introduced in this Chapter	229
Further Reading	230
General Problem Sets	230
Challenge Problem Sets	234
 Part 3 Movement	 239
9 Head-to-Head Movement	241
0. Introduction	241
1. Verb Movement ($V \rightarrow T$)	244
1.1 <i>French</i>	244
1.2 <i>Irish</i>	252
2. T Movement ($T \rightarrow C$)	258
3. <i>Do</i> -support	261
4. Multiple Auxiliaries and Affix-hopping in English	263
4.1 <i>Multiple Auxiliaries</i>	263
4.2 <i>Affix-hopping</i>	266
5. Summary	269
Appendix: Tests for Determining if a Language has $V \rightarrow T$ or Affix Lowering	270
Ideas Introduced in this Chapter	270
Further Reading	272
General Problem Sets	272
Challenge Problem Sets	277
 10 DP Movement	 283
0. Introduction	283
1. A Puzzle for the Theory of Theta Roles	283
2. Passives	289
3. Case	293
4. Raising: Reprise	298
5. Passives: Reprise	300
6. Closing Up a Loose End	302
7. Conclusion	304
Ideas Introduced in this Chapter	304
Further Reading	305
General Problem Sets	305

Challenge Problem Sets	311
11 <i>Wh</i>-movement	315
0. Introduction	315
1. Movement in <i>Wh</i> -questions	316
2. Islands	331
3. The Minimal Link Condition	334
3.1 <i>Wh-islands and the Minimal Link Condition</i>	334
3.2 The MLC in DP Movement and Head Movement	337
4. Echo Questions (<i>Wh</i> -in-situ) in English	339
5. Conclusion	341
Ideas Introduced in this Chapter	342
Further Reading	343
General Problem Sets	344
Challenge Problem Sets	346
12 A Unified Theory of Movement	351
0. Introduction	351
1. Move	353
2. Explaining Cross-linguistic Differences	356
3. Scope, LF Movement, and the MLC	361
3.1 <i>MLC Effects in Wh-in-situ Languages</i>	362
3.2 <i>English Quantifiers and Scope</i>	362
4. Conclusion	365
Ideas Introduced in this Chapter	365
Further Reading	366
General Problem Sets	367
Challenge Problem Sets	368
Part 4 Advanced Topics	371
13 Expanded VPs	373
0. Introduction	373
1. The Problem of Ditransitive Verbs	373
2. Light Verbs	375
3. Object Shift	378
4. Ditransitives: Reprise	383
Ideas Introduced in this Chapter	387
Further Reading	387

Preface and Acknowledgements	xiii
General Problem Sets	389
Challenge Problem Sets	390
14 Raising, Control, and Empty Categories	393
0. Introduction	393
1. Raising vs. Control	394
1.1 <i>Two Kinds of Theta Grids for Main Predicates</i>	394
1.2 <i>Distinguishing Raising from Control</i>	401
1.3 <i>What is PRO?</i>	403
2. Two Kinds of Raising, Two Kinds of Control	403
2.1 <i>Two Kinds of Raising</i>	403
2.2 <i>Two Kinds of Control</i>	407
2.3 <i>Summary of Predicate Types</i>	408
3. Control Theory	410
4. Another Kind of Null Subject: “Little” <i>pro</i>	413
5. Summary	415
Ideas Introduced in this Chapter	415
Further Reading	416
General Problem Sets	417
Challenge Problem Sets	419
15 Advanced Topics in Binding Theory	421
0. A Quick Review of Chapter 5 Binding Theory	421
1. Levels of Representation	422
2. The Definition of Binding Domain	424
2.1 <i>A Miscellany of Domain Violations</i>	424
2.2 <i>Anaphors</i>	425
2.3 <i>Pronouns</i>	428
Ideas Introduced in this Chapter	430
Further Reading	431
General Problem Sets	431
Challenge Problem Sets	432
Part 5 Alternatives	433
16 Lexical-Functional Grammar	435
0. Alternative Theories	435
1. C-structure	436
2. Functions	437
3. The Lexicon	438

4. F-structure	439
4.1 <i>Why F-structures?</i>	442
5. Assorted Phenomena	443
5.1 <i>Head Mobility</i>	444
5.2 <i>Passives</i>	445
5.3 <i>Raising and Control</i>	445
5.4 <i>Wh-movement: Long Distance Dependencies</i>	448
6. Conclusion	449
Ideas Introduced in this Chapter	449
Further Reading	451
General Problem Sets	452
Challenge Problem Sets	452
 17 Head-Driven Phrase Structure Grammar	 453

Preface and Acknowledgments

Almost every preface to every syntax textbook out there starts out by telling the reader how different this book is from every other syntax textbook. On one hand, this is often the truth: each author shows their own particular spin or emphasis. This is certainly true of this textbook. For example, you'll be hard pressed to find another textbook on Principles and Parameters syntax that uses as many Irish examples as this one does. Nor will you find another P&P textbook with a supplementary discussion of alternative theoretical approaches like LFG or HPSG. On the other hand, let's face facts. The basic material to be covered in an introductory textbook doesn't really vary much. One linguist may prefer a little more on binding theory, and a little less on control, etc. In this text, I've attempted to provide a relatively balanced presentation of most of the major issues and I've tried to do this in a student-friendly way. I've occasionally abstracted away from some of the thornier controversies, where I felt they weren't crucial to a student understanding the basics. This may, to a certain extent, make the professional syntactician feel that I've cut corners or laid out too rosy a picture. I did this on purpose, however, to give students a chance to absorb the fundamentals before challenging the issues. This is a textbook, not a scholarly tome, so its aim is to reach as many students as possible. The style is deliberately low key and friendly. This doesn't mean I don't want the students to challenge the material I've presented here. Throughout the book, you'll find gray "textboxes" that contain issues for further discussion, or interesting tidbits. Many of the problem sets also invite the student to challenge the black and white presentation I've given in the text. I encourage instructors to assign these, and students to do them, as they form an important part of the textbook. Instructors may note that if a favorite topic is not dealt with in the body of the text, a problem set may very well treat the question.

A quick word on the level of this textbook: This book is intended as an introduction to syntactic theory. It takes the student through most of the major issues in Principles and Parameters, from tree drawing to constraints on movement. While this book is written as an introduction, some students have reported it to be

challenging. I use this text in my upper division undergraduate introduction to syntax with success, but I can certainly see it being used in more advanced classes. I hope instructors will flesh out the book, and walk their students through some of the thornier issues.

This textbook has grown out of my lecture notes for my own classes. Needless to say, the form and shape of these notes have been influenced in terms of choice of material and presentation by the textbooks my own students have used. While the book you are reading is entirely my fault, it does owe a particular intellectual debt to the following three textbooks, which I have used in teaching at various times:

Cowper, Elizabeth (1992) *A Concise Introduction to Syntactic Theory: The Government and Binding Approach*. Chicago: Chicago University Press.

Haegeman, Liliane (1994) *Introduction to Government and Binding Theory* (2nd edition). Oxford: Blackwell.

Radford, Andrew (1988) *Transformational Grammar: A First Course*. Cambridge: Cambridge University Press.

I'd like to thank the authors of these books for breaking ground in presenting a complicated and integrated theory to the beginner. Writing this book has given me new appreciation for the difficulty of this task and their presentation of the material has undoubtedly influenced mine.

Sadly, during the final stages of putting the first edition of this text together, my dissertation director, teacher, mentor, and academic hero, Ken Hale passed away after a long illness. Ken always pushed the idea that theoretical syntax is best informed by cross-linguistic research; while at the same time, the accurate documentation of languages requires a sophisticated understanding of grammatical theory. These were important lessons that I learned from Ken and I hope students will glean the significance of both by reading this text. While I was writing this book (and much other work) Ken gave me many comments and his unfettered support. He was a great man and I will miss him terribly.

This, the second edition of this book, is considerably different from the first edition. Here is a brief list of the major differences between the two editions. This list is not comprehensive, many more minor differences can be found.

- The exercise sections of the chapters are now organized differently and are greatly expanded. Exercises are presented in the order that the material appears in the chapter. I have attempted to categorize each exercise for level and type.
- There are two types of problem sets: General and Challenge. These two types roughly correspond to the exercises that I assign to my regular students and my honors students respectively. Challenge Problem Sets often challenge the straightforward presentation of the material in the main body of the text.
- The former chapter 2 on structure and parts of speech has been split into two chapters. The new chapter 2 contains new information on subcategorization that

some instructors requested to better inform students about the role of part of speech in phrase structure processes. Also Adjectives are now distinguished from Adverbs.

- The phrase structure rules in the new chapter 3 have been completely revised. In particular, I'm using non-X-bar versions of TP and CP here, and have added embedded clauses to all the relevant rules.
- The definitions of precedence, exhaustive domination and c-command have all been significantly revised in the chapter on structural relations. A limited version of government is given for those instructors who wish to teach it to their students.
- The chapters on X-bar theory have many more trees and examples.
- DPs are used consistently from chapter 7 forward.
- I have added categories to the theta grids in the chapter on the Lexicon in order to tie them to the subcategories introduced in chapter 2.
- A new section on stacked VPs and affix-hopping has been added to the chapter on head movement
- VP-internal subjects are used consistently from chapter 9 forward
- The treatment of passives in chapter 10 is completely different from the previous edition. I have moved towards a Baker, Johnson and Roberts style approach where the *-en* morphology is directly assigned the internal theta role and accusative case by the verb in the syntax rather than in the lexicon.
- The treatment of locality conditions in the chapter on *wh*-movement is entirely new. I've dropped subjacency in favor of an MLC based approach. The chapter now includes an inventory of the major island types; but theoretical coverage is only given to *wh*-islands. (Although the chapter also contains a brief discussion of the Head-Movement Constraint and Super-raising in the context of the MLC).
- Chapter 12 now contains a more accurate discussion of *wh*-in situ and develops the ideas of feature checking, covert movement, and SPELLOUT.
- There is a brand new chapter on split VPs in a brand new section on "advanced topics," including sections on object shift, ditransitives, a Lasnik style analysis of Pseudogapping and a Hornstein style analysis of ACD.
- The chapter on Raising and Control has been moved to the new part of the book on advanced topics, and uses a split VP (vP-AgrOP-VP) structure to avoid ternary branching.
- There is a new chapter on advanced topics in binding theory. This looks at issues on level of representation, chains and the copy theory of movement. It also takes a relativized view of binding domain consistent with Chomsky (1986).
- I've taken some of the more controversial "comparing theories" language out of the chapters on LFG and HPSC.

I hope that instructors and students will find these revisions helpful. I have attempted where possible to take into account all the many comments and suggestions I received from people using the first edition. Although of course in order to maintain consistency, I was unable to do them all.

Acknowledgements:

I'd like to thank the many people who taught me syntax through the years: Barb Brunson, Noam Chomsky, Elizabeth Cowper, Ken Hale, Alec Marantz, Diane Massam, Jim McCloskey, Shigeru Miyagawa, and David Pesetsky. A number of people have read through this book or the previous edition and have given me extensive and helpful comments: William Alexander Ash Asudeh, Andy Barss, Mark Baltin, Luis Barragan, Emily Bender, Abbas Benmamoun, Joan Bresnan, Dirk Bury, Roy Chan, Danny Chen, Deborah Chen Pichler, Barbara Citko, Peter Cole, Lorenzo Demery, Sheila Dooley, Yehuda Falk, Leslie Ford, Alexandra Galani, Jila Ghomeshi, Erin Good, Paul Hagstrom, Ken Hale, Heidi Harley, Josh Harrison, Rachel Hayes, Bernhard Heigl, One-Soon Her, Stephan Hurtubise, Alana Johns, Mark Johnson, Simin Karimi, Andreas Kathol, Péter Lazar, Anne Lobeck, Leila Lomashivili, Sarah Longstaff, Ahmad Reza Lotfi, Ricardo Mairal, Joan Maling, Jack Martin, Diane Massam, Nathan McWhorter, Dave Medeiros, Martha McGinnis, Mirjana Miskovic-Lukovic, Jon Nissenbaum, Peter Norquest, Kazutoshi Ohno, Heidi Orcutt, Hyeson Park, David Pesetsky, Colin Phillips, Carl Pollard, Janet Randall, Norvin Richards, Frank Richter, Betsy Ritter, Ed Rubin, Ivan Sag, Theresa Satterfield, Leslie Saxon, Leah Shocket, Dan Siddiqi, Nick Sobin, Peggy Speas, Tania Strahan, Joshua Strauss, Robert Van Valin, Lisa deMena Travis, Enwei Wang, Dainon Woudstra, Susi Wurmbrand, Kim Youngroung, and several anonymous Blackwell reviewers. I'm absolutely convinced I've left someone off this large list, if it's you many apologies, I really did appreciate the help you gave me. The students in my *Introduction to Syntax* classes in Michigan in 1997, and in Arizona in 1998-2006 have used all or parts of this textbook as their reading. Thanks to them for their patience and suggestions. A number of problem sets in this book were graciously contributed by Sheila Dooley, Jila Ghomeshi, Erin Good, Heidi Harley, Simin Karimi, Chris Kennedy, Amy LaCross, Betsy Ritter and Leslie Saxon. I also owe a great debt to all my colleagues here at the University of Arizona for their help and support. In particular, Diana Archangeli, Andy Barss, Tom Bever, Sandiway Fong, Mike Hammond, Heidi Harley, Eloise Jelinek, Simin Karimi, Diane Ohala, Adam Ussishkin, and Andy Wedel deserve special mention. Ada Brunstein, Sarah Coleman, Simon Eckley, Tami Kaplan, Becky Kennison, Anna Oxbury, Rhonda Pearce, Beth Remmes, and Steve Smith of Blackwell all deserve many thanks for encouraging me to write this and the previous edition up, and then smoothing its way towards production. My family (Jean, Bob, Morag, Fiona, Pangur and Calvin) were all incredible in their support and love.

Go raibh maith agaibh!
